

CHEMICAL & METALLURGICAL ENGINEERING

A Weekly Technical Newspaper, Being the Incorporation of Electrochemical and Metallurgical Industry
and Iron and Steel Magazine

McGraw-Hill Company, Inc., New York City

Volume XXX

From January 1 to June 30, 1924

GENERAL ALPHABETICAL INDEX

Pages			
Jan. 7	1 to 40	Alkali, see also under sodium, potassium, etc.	
Jan. 14	41 to 80	—African plant closed	844
Jan. 21	81 to 130	—Market features in 1923. E. M. Taylor	90
Jan. 28	131 to 170	Alloys:	
Feb. 4	171 to 214	—Action of acid mine water. Robert J. McKay	228
Feb. 11	215 to 256	—American firm to operate Canadian plant	285
Feb. 18	257 to 298	—"Carbonless" alloys. J. Kent Smith	49
Feb. 25	299 to 338	—Corrosion resisting	671
Mar. 3	339 to 378	—Development of ferrotungsten and ferrovanadium. Frederick M. Becket	391
Mar. 10	379 to 418	—Ferro. Frederick M. Becket	186
Mar. 17	419 to 458	—Ferrochromium. Becket	316
Mar. 24	459 to 498	—Furnace brick	1032
Mar. 31	499 to 538	—For handling organic solvents. R. F. Remler (correction p. 587)	511
Apr. 7	539 to 578	—Importance of chromium, to chemical engineer. Clifford B. Bellis	149
Apr. 14	579 to 618	—Stainless steels. H. H. Abrams	430
Apr. 21	619 to 658	—Alumina, production of	994
Apr. 28	659 to 698	Aluminum:	
May 5	699 to 738	—Alloys:	
May 12	739 to 778	—Duralumin. Editorial	3
May 19	779 to 818	—As material of construction	1032
May 26	819 to 858	—Easy money from. Editorial statement	468
June 2	859 to 898	—For handling solvents. R. F. Remler	511
June 9	899 to 938	—Oxide, see under bauxite.	
June 16	939 to 978	—Salts, large output in 1923	683
June 23	979 to 1018	—Sulphate:	
June 30	1019 to 1048	—Sulphate from clay	761
		—American Bauxite Co. wins case	366
		—American Cellulose & Chemical Co. to open Cumberland, Md., plant	763
		American Ceramic Society:	
		—Prepares for Atlantic City meeting	130
		—Meeting 1924	266
		—Ready for	168
		—Full of interest	244
		—Plans long trip	642
		American Chemical Society:	
		—Absorption symposium	882
		—Akron chemists hear Wyckoff	366
		—Buckland, L. H. elected president	145
		—Catalysis symposium at M. I. T.	127
		—Central Pennsylvania section	483
		—Colloid Institute endorsed	681
		—Eminent Americans judge prize essays	129
		—Garvan honored at testimonial dinner	722
		—Heat transfer symposium plans	328, 486
		—Fuel section at Ithaca to be under Haslam	924
		—Kansas City, T. A. Boyd addresses	682
		—Section active	164
		—Meets with teachers of chemistry	762
		—New Jersey hears Marshal on glass	644
		—Meets with steel treaters	164
		—Nichols medal goes to Kraus	447
		—Northeastern section meeting	962
		—Petroleum division announces spring program	562
		—Prize contest helped by several universities	526
		—Report of catalysis symposium	147
		—Northeastern Section	366
		—Supports Mellon plan	229
		—Symposium on metals	447, 487
		—Washington meeting	605, 658, 698, 707, 881
		American Electrochemical Society:	
		—Announces activities	644
		—California Chapter discusses rotary kiln smelting of iron	923
		—Executive board elected	167
		—New York section discusses refractories	879
		—Philadelphia meeting plans	645
		—Philadelphia meeting	699, 753
		—Refractories discussion to feature Philadelphia meeting	484
		American Engineering Council, Williams explains constitution of	289
		American Gas Association:	
		—Students may have privileges	164
		American-German board of trade	703
		American Institute of Chemical Engineers:	
		—Beet sugar and western industry	960
		—Denver meeting	562
		—Reese elected president	4
		—Sugar and scenery to feature western meeting	289
		American Institute of Chemistry:	
		—Annual meeting	722
		—Ejects officers	601
		—Employment contract	369
		American Institute of Mining and Metallurgical Engineers:	
		—Plans for annual meeting	302
		American Lime & Stone Co.	13
		American Meat Packers Association:	
		—Organizes for progress. Edit.	341
		American Pulp & Paper Association, see under Paper and Pulp	
		American Society of Mechanical Engineers:	
		—Howe memorial lecture a feature	326
		—Industrial preparedness topic of Cleveland meeting	880
		—Material handling discussion	682
		—To discuss metals	842
		American Society of Safety Engineers:	
		—Hold technical session	167
		American Society of Steel Treaters:	
		—Standardizes definitions	507
		American Society for Testing Materials:	
		—Atlantic City meeting	328, 1036
		Ammonia:	
		—Content of cotton seed	906
		—From coal. Harry A. Curtis	749
		—Improvements in synthesis	198
		—Oxidation	600
		—Synthetic plant in France	763
		—In Spain	604, 682
		Ammonia-soda process, purification of brine for	24
		Ammonite Co. in receivership	564
		Ammonium:	
		—Nitrate:	
		—Is it an explosive? Dr. Rudolf Aufschläger with comments by Charles E. Monroe, J. Thompson Brown, G. N. Norman, R. I. Bashford, C. G. Storm and Dr. J. L. Sherrick	619
		Sulphate:	
		—British in Far East Markets	921
		—Prices fixed in Gt. Britain	525
		—Proposal to place on free list	483
		Anhydrite investigation planned	953
		Aniline oil and salts, review for 1923	109
		Argentina:	
		—American Match factory	245
		—Casein costs investigated	245
		Arsenic:	
		—Acid production	994
		—Additional report on supply	246
		—Austrian output is 90 tons	128
		—Belgian production	329
		—Canadian production	587
		—Deposits in Chile	445
		—Development of Wellington, N. S. deposit	762
		—During 1923	107
		—Found in Sweden	802
		—Reduction plant opened in California	284
		—Sales in 1923	116
		—Survey of ores made possible by appropriation	286
		—White, making	610

Artificial Silk:

- Cuprammonium process. L. S. Fryer. 743
- French industry grows 380
- Production gaining 564

Asbestos:

- Paper sizes reduced 842

Asphalt, see also under coal tar.

- Grinding with bentonite 986
- Use grows in 1923 17
- Atlantic Refining Co. research 443

B

- Baekeland, L. H., president A.C.S. 140
- Honored by King of Belgium 1035
- Baggase, utilizing fibres 159
- Baltimore would prevent wastes 329
- Barium chloride, mfr. 1032

Barium Dioxide:

- Higher duty 839
- Increase in duty expected 891
- Barium sulphide, mfr. 1032

Bauxite:

- American Co. wins case 366
- Output in 1923 117
- Production in 1923 528
- Bearing, self-lubricating 991
- Becket, Frederick M., Perkin medal awarded 44
- Beet molasses, possibilities of. W. J. Geldard 394
- Belgian arsenic production 329

Benzol:

- Recovering sludge acid in refining. H. Schlamp 188
- Review for 1923 116
- Will be produced in India 128

Bentonite, see colloidal clay.

- Bessemer Medal to Albert Sauveur. Editorial 362
- Richromates move in good volume. White 93

Bleach:

- Bleaching powder in 1923 106
- Methods of producing hypochlorites 240
- Blood poison specific found 645

Boil Weevil, see also calcium arsenate.

- Appropriation of \$100,000 asked for extermination 485
- German chemists study control 759
- New poison made 168
- North Carolina planters urged to combat 284
- Bon Air Co., wood products 486

Book Reviews: 64, 160, 282, 324, 481, 521, 560, 796, 837, 957.

- American Live Stock and Meat Industry. Rudolf A. Clemen 837
- Auskunftsbuch für die Chemische Industrie. H. Blücher 560
- Byproduct Coking. G. Stanley Cooper 65
- Chemical Synonyms and Trade Names. William Gardner 521
- Chemistry of Leather Manufacture. John Arthur Wilson 521
- Contact Production of Nitric Acid. A. K. Kolosoff 957
- Determination of Hydrogen Ions. W. Mansfield Clark 482
- Economics of overhead costs. John Maurice Clark 282
- Einfache und Fraktionierte Destillation in Theorie und Praxis. Dr. C. V. Reckenberg 996
- Lead. J. A. Smythe 324
- Marine Products of Commerce. Donald K. Tressler 64
- Mechanical Engineers' Handbook. Lionel S. Marks 838
- Metallurgy of Iron and Steel. Bradley Sloughton 160
- Modern Electroplating. W. E. Hughes 324
- Modern Gas Producers. N. E. Rambush 796
- Personnel Management. W. D. Scott and R. C. Clothier 481
- Technical Writing. T. A. Rickard 64

Books Received: 25, 65, 160, 200, 241, 283, 442, 482, 560, 639, 719, 757, 877, 958.

- Borax from colemanite. Burton G. Wood 976
- Breithut, successor may not be appointed. 801

British:

- Activities in chemical engineering 180
- Ammonium sulphat in Far East 921
- Ammonium sulphate prices fixed 525
- Dye industry. Frederick E. Breithut 869

Empire Exhibition:

- Chemical section nearing completion 554
- Description by correspondent 539
- Invitation. Editorial 763
- German dye negotiations not abandoned 564
- Brooklyn Polytechnic chemists meet 69
- Bureau of Chemistry studies Corn Products explosion 69

Bureau of Mines:

- Alloy work at Cornell at stops 327
- Cooperative work with University of Washington 366
- Jones succeeds Sherrick in gas lab 69
- Missouri station opens 286
- Not to be transferred. Hoover 286
- Oil men shifting 243

Bureau of Standards:

- Competitive examinations 683
- Gillett made metallurgical chief 407
- Seeks men for vacancies 643
- Shaap process comment 554
- Specifications work progresses 326
- Burner, refinery oil 280
- Burns, butesin picrate for 602
- Burroughs Magnetic Steel plant operated by American concern 286
- Butesin picrate, a new remedy for burns 602
- Butlerworth-Judson appeal lost by government 328
- Butyl alcohol concern 527

C**Calcium:**

- Acetate:
 - Free admission into Canada 165
 - March production 723
 - Outlook for, encouraging. W. S. Gray, Jr. 90
 - Production down in April 921
 - Reduced output in December 289
 - Review for 1923 114
 - Borate, lower freight rates on 286
- Arsenate:
 - Agitation continues for removal of duty on 71
 - Airplane may increase use 307
 - Better insecticides sought 9
 - Electrification of, to be studied 601
 - February production 643
 - Production of becomes stabilized 839
 - Review for 1923 116
 - Revolutionary process denied by government official 444
 - Sales increase 75 percent 448
 - Southern companies build plant 486
 - Texas plant 446
 - Trade retarded by tariff legislation 165
 - U. S. funds asked for purchases 327
- Carbide:
 - Exports of Canada 762
 - Hearing on freights 643
 - Carbonate, see under lime
 - Hypochlorite, methods of production 240

California:

- Arsenic reduction plant opened 284
- Industrial expansion 439
- Canada:
 - Fuel found valuable 366
 - Free admission of calcium acetate 165
 - Increase in paint and varnish trade during 1923 121
 - Larger pulpwood shipments 168
 - Organic industry expanding 366
 - Seeks domestic coal for coke production 166

Canadian:

- Auto & Art Glass Co. Ltd. 326
- Ban on oleomargarine 723
- Chemical imports grow 841
- Concern obtains sweeping rights for gas and oil 802
- Mineral and metal output high 30
- Peat fuel plant 486
- Pulpwood commission to speed work 366
- Rubber output grows 524
- Salt interests Americans 922
- Copper bill opposed 525
- May induce centralized buying 644

Carbon:

- Activated:
 - Method of producing 599
- Black:
 - Arkansas authorizes plant 244
 - Manufacture 719
 - Output in 1922 larger 128
 - Production in 1922 643
 - To be made in Alberta 604
 - To make from tires 244
 - Decolorizing 441

Monoxide:

- First aid for victims 824
- From explosives, being investigated 762
- Would use on crabs 285
- Carbonization, see also under combustion.
 - Coal. Benzol will be produced in India 128
 - Low-temperature. C. H. S. Tupholme 271, 471, 861, 1019
 - Test Results from low temperature carbonization. C. H. S. Tupholme 397

Carnegie Institute of Technology:

- Announces metallurgy fellowship 164
- Chemical engineering lectures 168
- First C. E. A. lecture by H. C. Parmelee 290
- Caseln:
 - Production costs in Argentina 245
 - Tariff hearing 739, 1036

Catalogs Received: 62, 158, 197, 239, 280, 321, 361, 401, 440, 479, 519, 557, 597, 637, 677, 718, 795, 835, 875, 915, 955, 993.**Catalysis:**

- A. C. S. symposium at M. I. T. well attended 127
- Nitrogen fixation 365
- Symposium in Boston 147

- Cellophane manufacture 518
- Celluloid, non-flammable 994

Cellulose, See also under paper and pulp:

- Acetate 994
- Importance of research in the industry 870

Cement:

- Acid Proof 956
- Alabama plants active 920
- Alumina, produced here 762
- Combustion in kilns 481
- High alumina 962
- New plant in Canada 802
- Oxidation during firing 991
- Pennsylvania plants active 408
- Portland, large stocks 328
- Resistance to salt water of high alumina cements 359
- Setting of 221
- Southwestern, Co. expands 842
- Spanish industry lacks coloring materials 128

Centrifugal:

- Cost of drives, Matthew McIlhenny 758

Ceramics:

- Absorption of sulphur by clayware 478
- Celite Products Co. install large kiln 923
- Continuous grinding 783
- Drying of clay investigated 435
- Exhibit at Pittsburgh 30
- Faint grinding 953
- French congress 922
- Increasing bonding power of abrasives 363
- Pennsylvania ranks high 29
- Resistance of glazes to abrasion studied 353
- Trenton Potteries Co. 682
- West Virginia pottery plant opened 366
- Certain-teed Products plant. A. W. Allen 45

Chemical:

- Education:
 - Seek reforms 840
- Equipment Association:
 - Exposition planned 30, 446, 840
- Engineering:
 - French form syndicate 325
 - Invades Chilean nitrate industry 2
 - Pittsburgh has special lectures 168
- Exports:
 - During 1923 122
 - Gain in January 368
 - Gain in April 882
 - Gain for first two months of year 563
 - Ford, plant nearing completion 952

Foundation:

- Court upholds sale of German patents 28
- Editorial 41
- Suit appealed by government 365
- May have hearing in October 801

Imports:

- During 1923 125
- In April at New York 760
- Increase sharply in December 205
- March, show decline 724
- Of Canada grow 841
- Valuation in February 526

Industry:

- American-French committee to aid. Center, New York growing as 405
- Columbia dam may create, in Northwest 881
- Japanese, hampered by lack of materials 605
- Outlook for methanol and acetate of lime encouraging. W. S. Gray, Jr. 90
- Consumption moderate in April 726
- Progresses in Poland 328

Industries Exposition:

- Plans pushed for 1925 show 842
- Show shaping up for 1925 645
- Tenth show coming in 1925 484

Prices:

- December review 27
- During 1923 120
- Higher average for 104
- Remain constant during January 206
- February. Call better 370
- March 566
- May 884

Production:

- Larger 101

Trade:

- Good demand in Paris 407
- Railroads move large tonnages 69

Warfare Service:

- American supremacy. Editorial 853
- Exhibit prepared for chemists 408
- Reserve organized in Washington 284

Chemists and Chemistry:

- Congress in France 486
- Fifth annual conference of International Union 408
- In Agriculture, uses shown 408
- Metzger, F. J. re-elected president 760
- Of deterioration 563
- To eliminate waste in use 641

Chile:		Construction and Operation: 40, 70, 175, 213, 255, 297, 337, 377, 417, 457, 495, 535, 573, 613, 653, 693, 733, 771, 811, 851, 891, 931, 971, 1009, 1047	Dyes—continued	
—Arsenic deposits	445		—Brightening outlook for 1924, du Pont	87
—Nitrate:			—Brown developed	146
—American chemical engineering invades industry. Editorial.....	2	Copper:	—Foreign combination against dye industry. Editorial	178
—Federal investigation of.....	5	—Found in Sweden	—Fraudulent drawbacks on Italian	29
—Shanks process	5	—Import duty proposed	—From spruce turpentine	1036
—Guggenheim process	7	—Corn's uses many	—Grasselli-Bayer agreement	1035
—Allen process	7	—Corn Products Co. Pekin plant starch explosion	—Imports increase during March	602
—Industry in 1923	563	—Cause found	—May decline	959
—Producers place sales restrictions..	799	—Bureau report	—Importers seek changes in regulations	203
Citric Acid:		—Opens Kansas City plant.....	—Win appeal	961
—Review for 1923.....	115	Cornell University:	—Industry in Great Britain. Frederick E. Breithut	869
—Sicily largest producer	485	—Alloy work stops	—Industry and entomology. Editorial	923
Chlorine, see also bleach.		—New chem. lab. opened	—Industry's troubles. Editorial	459
—Compressors	876	Corrosion:	—Italian industry report	165
—De Vains process.....	252, 842	—By acid mine water. Robert J. McKay	—Japanese situation	843
—Industrial outlets. Paul S. Brallier ..	508, 542, 625	—Graphitic examples of	—Manufacturing processes	63
—Liquid, replacing bleaching powder. E. M. Allen	88	—Mechanism. Walter G. Whitman and R. P. Russell (Correction p. 752) ..	—New standards for customs appraisals ..	841
—Multiple unit car ruling.....	603, 683	—Ulick R. Evans (Comment p. 1033) ..	—Plants. Causes of fire in. William D. Milne	388
Chromite imports for 1923.....	93	—Metal surveys	—Production, domestic, import figures reveal larger scope	248
Chromium:		—Nickel on steel	—Production reaches record totals in 1923	685
—For corrosion resistance. Editorial..	615	—Rustproofing compound	—Production report coming in April ..	288
—Importance of, to chemical engineer. Clifford B. Bellis	149	—Surveys planned	—Standard methods sought for testing strength	723
—Ore investigated	407	—Cotton crop in 1923	—Standardization proposed	681
—Plating steel. Kevin W. Schwartz ..	627	—Coupling, flexible	—Strength measured by spectro-photometer	762
—Uses explained by Mitchell	562	Crampton Bill:	—Swiss. Shipments to U. S. in 1923 decline	128
Citrus trees, fumigating. W. Lee Tanner, Clark, L. B. to be a trade commissioner at Buenos Aires	884	—Action may be deferred	—To indicate fastness	326
—No action taken	963	—Passes in House		
—Reported favorably by house.....	721	—Credit clause in oil contract. Wellington Gustin		
Clay:				
—Bentonite for grinding asphalt. H. S. Spence	986	Cresylic Acid:	Eastman Kodak Co. ordered to end monopoly	682
—Colloidal for bleaching oils.....	783	—Domestic interests oppose lower duty on	Editorial: 1, 41, 83, 137, 177, 215, 257, 299, 339, 379, 419, 459, 497, 537, 575, 615, 655, 695, 735, 773, 813, 853, 893, 933, 973, 1011.	
—Decolorizing	876	—Review for 1923	—A notable achievement.....	1012
—Georgia as rubber fillers.....	960	—Tariff anomaly. T. H. Davis	—A scientific idyl	218
Coal:		—Critical tables, Western Electric pledges support	—Adding to worries of calcium arsenite manufacturer	419
—Fuel compound developed.....	326	Crushing and Grinding, see also pulverizing and disintegration.	—Acidulating a slurry economically....	339
—Graded temperature zones in carbonization. C. H. S. Tupholme.....	54	—Fertilizer ingredients. L. H. Sturtevant	—Albert Sauveur	302
—New ideas on products	757	Crystallization:	—American chemical engineering penetrates Chilean nitrate industry.....	2
